EXPERIENCE

Software Engineering Leader

eBay Inc.

📅 May 2015 – Ongoing

📍 San Francisco, CA

4 years

- I lead engineering for StubHub's Experiences business, which consists of 30+ engineers working through challenging technical problems in search, recommendations, growth, quality, data, and host tools.
- Led the social platform team for creating an entire social network and built the entire social pipeline, taking StubHub beyond recommendation from purchases for the first time.
- Led platform re-architecture of to support multi-product and led engineering for all guest facing efforts for personalization.
- Designed, Built, and Rolled out eight large-scale, high-availability products and platforms along with 60+ RESTful APIs using java spring boot, Scala & Spark with microservices architecture.
- Worked cross-functional partners in the business, ranging from data scientists, product managers, UX designers, and engineers, to the business visionaries and stakeholders.

EDUCATION

MBA in Leadership & Management

University of Illinois, Urbana-Champaign

M.S. in Computer Science

Georgia Institute of Technology

B.S. in Computer Science

B.S. in Statistics

B.S. in Cognitive Science

Degree in Industrial Engineering & Operational Research

Certificate in Entrepreneur & Technology

University of California, Berkeley

Core in Finance, Economics, Analytics

Harvard Business School

PROUD PROJECTS

Promotion Engine

Built a promotion engine for 50 million users based on location, purchase history and tracking data to send real-time deals, ads and emails

Ticketing Platform

Developed an entire end to end ticketing platform for event organizers and promoters - supports verification of tickets at entry within the app

Patter

Built an entire web app for reducing noise at the workplace and highlights what matters and generating new ideas with anonymous feedbacks

User Social Match Graph

Developed a user social graph on top of Hbase using graphDB to associate relationships between users and their friends based on likes, events & activity

Social Data Scraper

A backend engine to find the relative score of how likely a user is going to purchase based on social network data

Splunk Logging Machine Learning

Used Splunk's Django framework and manipulated DOM elements to visualize prediction graphs for growth
